PROFESSIONAL SUMMARY

Final-year B.Tech Electronics and Communication Engineering student (2026) with hands-on experience building Python and web-based applications, including REST API integration, computer vision solutions with OpenCV and MediaPipe, and database-driven systems using MySQL and MongoDB. Proficient in JavaScript, HTML, and CSS with a track record of delivering responsive, user-focused web applications. Strong problem-solving abilities and quick learner, seeking a Software Engineer, Python Developer, or Web Developer role to apply technical skills and drive impactful software solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C

Frontend Development: HTML5, CSS3, JavaScript, Responsive Design, DOM Manipulation

Databases: MySQL, MongoDB

Computer Vision: OpenCV, MediaPipe

APIs: REST API Integration, FakeStore API, OpenWeather API, JSON

Tools & Platforms: VS Code, Git, GitHub, Jupyter Notebook, Google Colab

PROJECTS

E-Commerce Web Application (FakeStore API) | HTML5, CSS3, JavaScript, REST API

- Built a responsive e-commerce web application by integrating the FakeStore REST API to dynamically fetch and display product data.
- Implemented product search, category filtering, product detail pages, and a JavaScript-based shopping cart.
- Optimized DOM manipulation and API handling to deliver a smooth experience across desktop and mobile devices.

Weather Application | HTML5, CSS3, JavaScript, OpenWeather API, REST API

- Developed a responsive weather application integrating the OpenWeather API to display real-time temperature, humidity, and wind speed data.
- Implemented city-based search with error handling for invalid inputs to improve reliability.
- Designed a clean, mobile-friendly interface for fast access to live weather conditions.

Finger Counting System Using Python | Python, OpenCV, MediaPipe, Computer Vision

- Built a real-time computer vision application using OpenCV and MediaPipe to detect hand landmarks via webcam input.
- Engineered logic to accurately count raised fingers in real time based on detected hand landmarks.
- Optimized frame processing for smooth, low-latency real-time performance.

INTERNSHIP EXPERIENCE

Full Stack Development Intern — OceanApps Technologies, Ramachandrapuram

- Developed and maintained web application features across front-end and back-end layers in a collaborative team environment.
- Partnered with the development team to build new functionality and troubleshoot issues across the application stack.

Backend Technologies Intern — OceanApps Technologies, Ramachandrapuram

- Built and maintained server-side logic and database operations to support core application functionality.
- Strengthened database management and structured data-handling practices through hands-on backend development.

EDUCATION

B.Tech, Electronics and Communication Engineering — VSM College of Engineering, JNTU-Kakinada | CGPA: 7.1/10 | 2022 - 2026

Intermediate (MPC) — Sri Chaitanya Junior College, Rajamahendravaram | 74% | 2020 - 2022

SSC — ZPP High School, Kesavaram | 85% | 2019 - 2020

CERTIFICATIONS

- Getting Started with Artificial Intelligence — IBM
- Python Programming — SprintM Technologies Pvt. Ltd.

ACHIEVEMENTS

- Independently designed and delivered multiple end-to-end technical projects spanning web development and computer vision, beyond core academic requirements.
- Completed two consecutive technical internships at OceanApps Technologies and earned certifications in AI (IBM) and Python (SprintM Technologies), demonstrating continuous, self-directed learning.

SOFT SKILLS

Problem Solving • Communication • Teamwork • Leadership • Adaptability • Quick Learner • Time Management
